

A proactive Hardware
Secure Backup Drive,
in a world of reactive
software security
solutions.

Supported Operating Systems	<ul style="list-style-type: none"> • Windows 10
Fire Protection	<ul style="list-style-type: none"> • Up to 1550° F, 30 minutes per ASTM E-119
Water Protection	<ul style="list-style-type: none"> • IP68: Fully submersed, fresh or salt water, 10 foot depth, 72 hours
Theft Protection	<ul style="list-style-type: none"> • Metal Kensington Lock Slot, optional Floor Mount Kit
Operating Temperature	<ul style="list-style-type: none"> • 5°C to 35°C (40°F to 95°F)
Non-Operating Temperature	<ul style="list-style-type: none"> • -20°C to 60°C (-5°F to 140°F)
Operating Humidity	<ul style="list-style-type: none"> • 5% – 95% Relative Humidity

Data backup meet your new best friend. With two redundant hard drives and ioSafe's fireproof and waterproof technology, the ioSafe Duo SafeHouse is the simplest and most affordable way to fully protect your data. Our ioSafe SafeHouse device defends your data backups against malware, viruses, worms, spyware, and future zero-day attacks. Your backup data is isolated and write protected to prevent unauthorized alteration, thus significantly reducing the areas where malware can live and reproduce.

With the typical attack taking an average of 45-65 days to resolve, our ioSafe Duo SafeHouse hardware technology preserves your organization's data. Should an attack take place our ioSafe Duo SafeHouse saves you time and resources allowing for full data recovery from your last good backup.

Our ioSafe Duo SafeHouse hardware can be connected to most desktop computers, workstations, servers, or laptops via USB-C connection.

From the moment our ioSafe Duo SafeHouse is powered on, our hardware functions independently of the host system. Neither operating system nor applications can bypass, disable, or power off our ioSafe Duo SafeHouse hardware.

ioSafe Duo SafeHouse hardware is undetectable by attackers, whether the attack is remote or an insider threat.

ioSafe Duo SafeHouse hardware requires NOVA Backup software tool to authorize, perform and access valid data backups.

Effortlessly—and simultaneously—create copies of your data, with our all-new ioSafe Duo SafeHouse. The ioSafe Duo SafeHouse is blazingly fast and protects your critical work from disaster, whether natural or man-made.

Product Dimensions	Product Weight	Electrical
150mm W x 292mm L x 230mm H (5.9in W x 11.5in L x 9.06in H)	Unpopulated: 10.8 kg (23.8 lbs) Populated: 13-15 kg (28-32 lbs)	60W, 100V to 240V AC, 50/60 Hz, Single Phase

Warranty and Data Recovery Service

2 years hardware warranty standard for all configurations.

Devices that include factory-installed hard drives include two years DRS, extendable to 5 years. DRS upgrade includes 5 years of hardware warranty coverage

United States Patent issued October, 18 2019

** Requires NOVA Backup Software **

“The ioSafe Duo SafeHouse defied all expectations. Because no matter what was thrown at it, we couldn’t change the data”

– Charles Tendell, ABC and CNN’s cybersecurity contributor, The Charles Tendell Show “HACKED”

“Never have we seen anything like this... The easy way to describe this one is a true safe house for your data.”

- Greg "Mobman" Hannis ~VipeLine Solutions
